

School of Planning and Architecture, Vijayawada

An Institute of National Importance
Ministry of Education, Govt. of India

About MBEM

The course of MBEM encourages the students to address the significantly evolving requirements of the built environment. At the same time, it enables the students to experience the simulated and computerized application measures in various scenarios.

The course intends to amplify the knowledge of construction and the art of management through lectures and practical case studies. The curriculum enables the students in acquiring knowledge in state-of-the-art construction techniques and other related topics such as Materials, Real Estate Management, Finance Management, Quality Management, Contracting, Safety and Legal Issues, Value Engineering, Human Resource Management, Advanced Technologies, and Operational Research. The course emphasizes on the importance of today's construction needs for a rewarding management career in the construction and infrastructure industry.

Why SPAV

Students are encouraged to think analytically about a variety of topics and to apply their insights throughout the course, both as a team and individually. Real-world projects in the studio introduce students to current scenarios or challenges, preparing them to use their academic knowledge.

Curriculum

The curriculum offered by Building Engineering and Management at School of Planning & Architecture Vijayawada, has been designed primarily for Architects and Civil Engineers, and it addresses the three major aspects of project management: Cost, Quality and Time. The first three semesters equip the students with practical knowledge in schedule, cost, quality, procurement and risk management.

In addition to this, the summer internship gives an opportunity to apply the knowledge gained in the previous semesters on live projects under the guidance of premier organizations. The students are exposed to field experts through webinars, special lectures, and workshops, providing them with a comprehensive understanding of the subject and the industry.
