

2nd International Conference on Building Engineering and Management

At School of Planning and Architecture (SPA), Vijayawada, India

About the Conference

We are pleased to invite researchers, academicians, industry professionals, practitioners, and policymakers to the 2nd International Conference on Building Engineering and Management (ICBEM 2026), organized by School of Planning and Architecture, Vijayawada. Building on the success of the first edition, ICBEM 2026 aims to serve as a global platform for the exchange of innovative ideas, research findings, and practical experiences in the domains of building engineering and construction management. The conference focuses on emerging trends, advanced technologies, sustainable practices, and management innovations shaping the future of the built environment.

The primary objective of the 2nd International Conference on Building Engineering and Management (ICBEM 2026) is to provide an international platform for researchers, academicians, industry professionals, and policymakers to exchange knowledge, share research findings, and discuss recent advancements in building engineering and construction management. The conference aims to foster interdisciplinary collaboration, encourage innovation in sustainable and advanced construction practices, and bridge the gap between academic research and industry applications. It also seeks to address contemporary challenges in urban infrastructure development, project execution, cost and risk management, and digital transformation in the construction sector. Through keynote sessions, technical paper presentations, and interactive discussions, the conference aspires to contribute to the development of efficient, resilient, and future-ready built environments.
